

# Vibe Coding

--Radha krishna

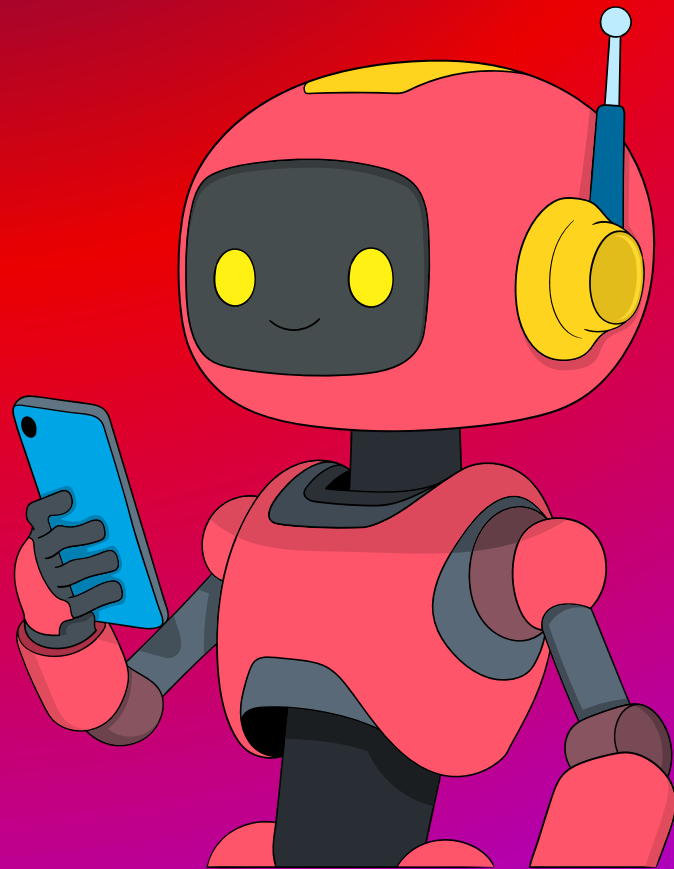

# What is Vibe Coding?

Vibe coding means building apps or websites with the help AI and this requires little or No Coding

Makes software  
development faster &  
Easier

Few Tools  
list which I  
Explored

# POPULAR VIBE CODING TOOLS

1. Lovable--For simple Websites
2. Emergent --it is used to create some backend also
3. Bolt--it like Lovable
4. Cursor--it like Lovable
5. Google firebase Studio--It is most powerful one

Ideal for  
startups and  
students

# Advantages

- Faster Development
- Low cost
- Encourages innovation
- No Deep Programming knowledge needed

From idea to app, no coding trap

- Limited customization
- Platform Dependency
- Not suitable for complex Systems
- Performance issues in Large apps

# Limitations

Explore many tools  
and find best one

# Are Jobs Safe in AI coding era ?

Absolutely No

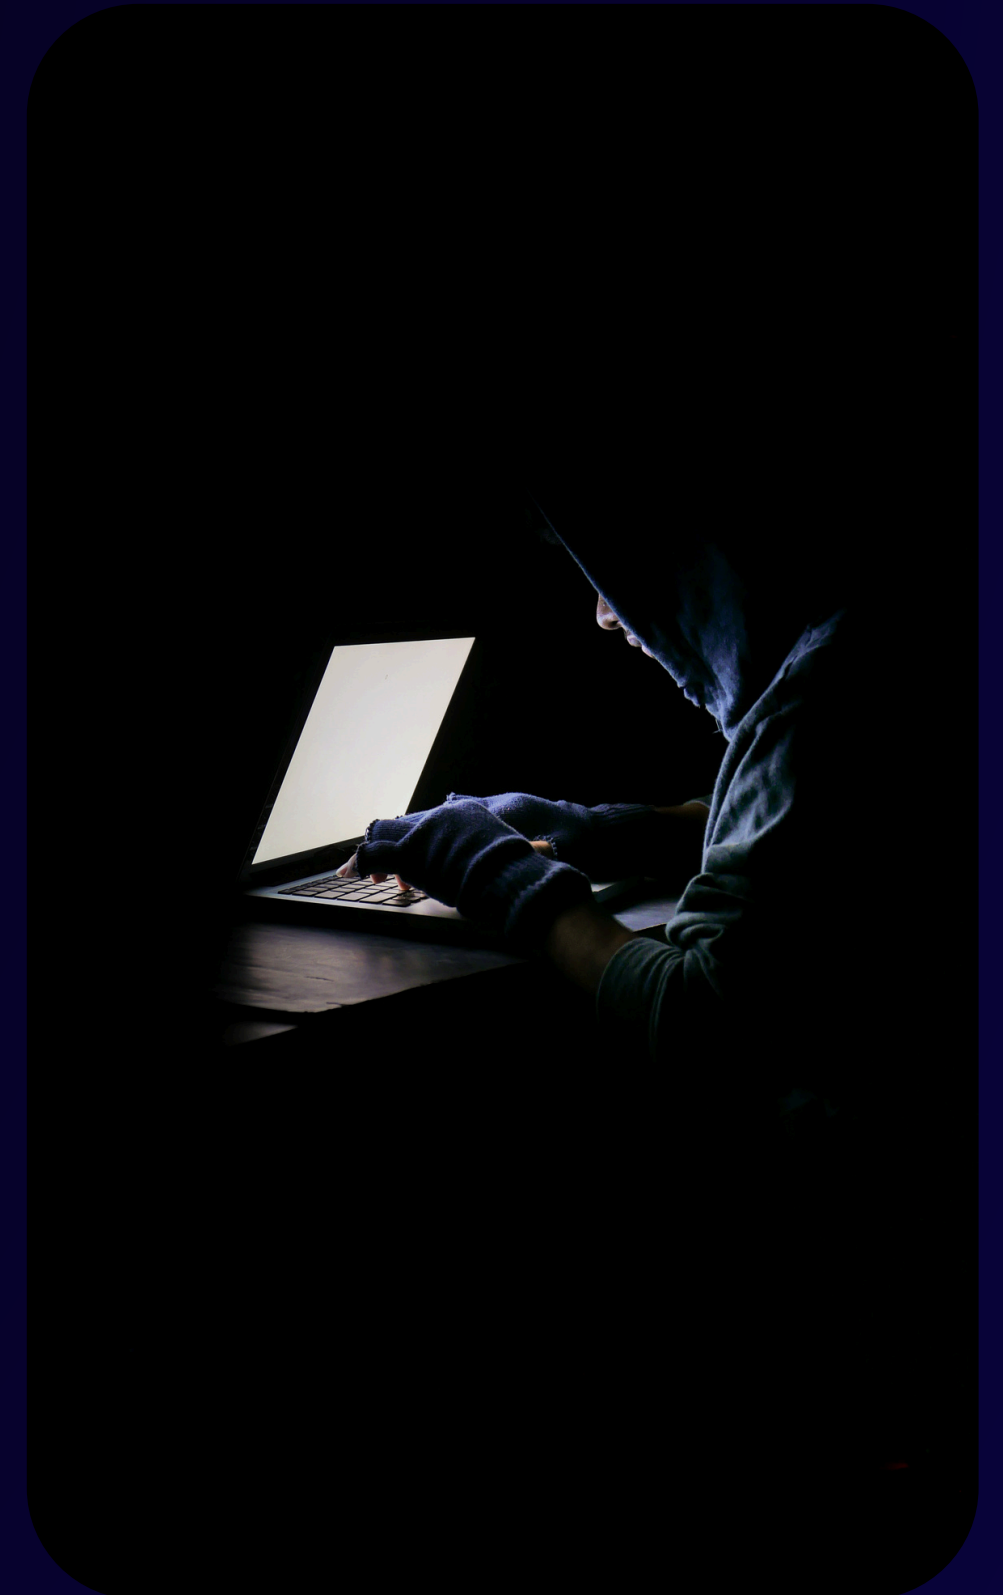

It reduces repeatative and simple code and one thing technology changes jobs, not removes them.

# How Developers can stay job-safe

Upgrade skills  
Continuously

- Learn problem solving and logic
- Understand system design and architecture
- Combine coding skills with AI

# Thank You
